5. Fire-fighting Measures

Extinguishing Media	Use any means suitable for extinguishing surrounding fire.

Specific Hazards Arising from the Substance or Mixture	Not combustible, but substance is an oxidizer and its heat of reaction with reducing agents or combustibles may cause ignition. Can react with metals to release flammable hydrogen gas. May react explosively with combustible organic or readily oxidizable materials such as: alcohols, turpentine, charcoal, organic refuse, metal powder, hydrogen sulfide, etc.

6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures	Wear protective gloves and eye protection. In case of inadequate ventilation wear respiratory protection.
Cleanup and Containment Methods and Materials	Cover the spill with Sodium Carbonate or a soda ash-slaked lime mixture (50:50). Mix and add water to form slurry. Decant the liquid to the drain with excess water. Treat the solid residue as normal refuse unless there are regulations prohibiting this practice due to the iron content. Always dispose of in accordance with local regulations.

7. Handling and Storage

Precautions for Safe Handling and Storage Conditions	Store in corrosive resistant container with a resistant inner liner. As with all chemicals, wash hands thoroughly after handling. Avoid contact with eyes and skin. Protect from freezing and physical damage.
